Security

Marin Chapter and Dominican University of CA

DECEMBER 5 WEDNESDAY

World Affairs Council of Northern California

Protecting Americans Overseas

Mike Howard

Chief Security Officer,
Microsoft Corporation

Microsoft has more than 180,000 international employees and vendors in over 700 installations in more than 100 countries. Like American officials at our embassies abroad, they frequently face threats from natural disasters, terrorism or the violent consequences of political upheavals. Microsoft has developed various means for ensuring their physical safety on site and when traveling in critical areas, and has established three Global Security Operations Centers in the US, UK and India. These centers monitor security threats worldwide and coordinate responses to emergency situations. Also, as a technological innovator, Microsoft must take special security measures to ensure its trade secrets are protected against commercial espionage.

Mike Howard led the development of these Centers and has overall responsibility for Microsoft's security operations abroad, including crisis management, executive protection, security technology, intelligence and employee awareness. He is a former CIA Chief of Station.

Pre-paid reservations required for guaranteed seating.
Dinner reservations required by Friday, November 30.

This program is co-sponsored by the Marin Chapter of the United Nations Association.
