Dominican University's ***Master of Business Administration in Global Management (MBA-GM)*** is a 36-unit degree program. As a student in this dynamic program, you will learn about the economic, social, cultural, political, and legal implications of conducting business in today's global economy. You will garner a broad international perspective while also focusing on various regional issues.

ENVISION THE PROCESS

Our students have opportunities to work with three School of Business and Leadership centers of excellence: the Institute for Leadership Studies, which is known for its Leadership Lecture Series and student leadership development programs; the Venture Greenhouse, a business accelerator that helps early-stage socially- and environmentally-focused entrepreneurial ventures to achieve rapid growth and greater success in the marketplace; and the Environmental Finance Center West (EFCW), a federally-supported center that helps create and build sustainable economies at local, national and international levels. In addition, the North Bay Office of the U.S. Commercial Service, located on the Dominican campus, provides a unique venue for partnership opportunities with School of Business and Leadership faculty and students.
